

Your Partner in PUBLIC SAFETY

Dedicated to providing quality certification programs for the safe installation, operation and maintenance of public safety systems; delivering value for members by providing the latest information and education in the industry.

On-Site Certification Request

As training budgets continue to remain tight, the Michigan Section IMSA has taken steps to reduce overall cost by offering certification programs at your location. To accomplish this, basic information is needed to facilitate planning and scheduling. Offering training at your facility will reduce cost and, if neighboring agencies participated, could reduce cost further.

Please supply the following information. We will contact you to discuss your specific interest.

NOTE: Signs & Pavement Markings Technician programs are *totally new* with all new study reference guides. Level 1 still covers both signs & markings. Level 2 is divided up specifically for signs or markings. Visit the international website for more detail at www.ImsaSafety.org.

Agency _____ Name _____
